

AGWA Training

Posted by jopadeyi - 2008/10/27 01:51

Could anyone direct me to where I could get a training on AGWA 2.0.

We have hosted training sessions in the past, but do not hold them regularly. Contact Dave Goodrich if you'd like to see if something could be worked out. In the meantime, have you worked through the tutorials?

Regarding the questions in your email (the address you sent it to is not checked regularly and will actually be discontinued in the near future), yes AGWA can be used outside of the US using local data. You will have to select a weather generator station, but you can select an existing station that has similar climate to your area, edit an existing station to put in values for your area, or create a new station with values for your area. The required data and formatting for the WGN file can be found in the SWAT manual, available at <http://www.brc.tamus.edu/swat/doc.html>.

Thank you very much for the feedback. My frequently check email address is jopadeyi@hotmail.com

I am planning to us AGWA in a research study in Guyana.

Thanks
